

# Wind Resource of the United States

Annual Average Wind Speed at 100 Meters above Surface Level

**About the Data**

The data shown for the contiguous United States (2007–2013), Hawaii (2000–2019), and Alaska (2001–2020) are average wind speeds at 100 m above surface level and are derived from modeled resource estimates developed by NREL via the WIND Toolkit.
